**Re: Wayne-Sanderson Farms LLC
Proposed New Backup Public Supply Well**

Dear Mr. Bailey,

On behalf of Wayne-Sanderson Farms LLC (WSF), Chas. N. Clark Associates, LTD is submitting a drilling permit application packet for the construction and operations of a new public supply well (Well No. 2) for the WSF Feed Mill in southern Freestone County, Texas. Please note that WSF intends to use the groundwater from the proposed well solely as a back-up discharge point that will be used when the primary well (Well No. 1) is inoperative due to repair or maintenance. The following documents are included as part of this submittal:

- Water Well Drilling Permit Application form
- Current operating permit for the WSF Feed Mill
- Site Map
- List of neighboring wells within 1,500 feet of the proposed well
- Recorded deeds of the Feed Mill property
- Appraisal district records for the land parcels comprising the Feed Mill footprint

We respectfully request that METGCD review the enclosed information for approval to construct and operate the proposed new well.

Sincerely,

Chas. N. Clark Associates, Ltd.

Jeff Graves, P.E.
Principal
